CLINICAL ISSUES IN
DIALYSIS TREATMENT

PRELIMINARY PROGRAM

LIVING TOMORROW

Indringingsweg 1

B-1800 Vilvoorde

PROGRAM

Dear Colleagues,

Dialysis treatment is a critical aspect of the life of the patients with end-stage renal disease who therefore deserve the best possible care from us nephrologists. Although significant progress has been made, we still face many uncertainties and daily clinical challenges while caring for our patients.

This year's State of the Art Symposium organized by the Belgian Society of Nephrology seeks to highlight the current knowledge and address the daily challenges in the different types of dialysis therapy. We aim for an interactive and innovative meeting where discussion is encouraged. We cordially invite you to join us and to share your experiences with peers, seeking high quality dialysis programs and optimized care for our patients, their partners, physicians and the health care teams.

Looking forward to welcoming you in Vilvoorde,

K. Claes F. Jouret P. Janssens
